DCR ENGINEERS & CONSTRUCTORS

Owner

DCR provides all the up-front permitting, conceptual design and preliminary engineering services for Owner project development. This service includes equipment specifications and EPC contract writing, negotiation and execution. DCR provides all project management services during the engineering procurement and construction phases of the project

DCR provides Engineering consultants, in all disciplines to perform EPC engineering reviews and factory inspections. This service is incorporated into project management on an as needed basis to control costs but at the same time assure a successful project.

Our Team of experts come equipped with state of the art proprietary document control database management and project control accounting programs at no additional cost to the Owner. All programs are turned over to the Owner, after completion of the project, as fully functional plant management tools.

's Representa
